We hope this brochure has given you some ideas. The truth is, Family Fun doesn't have to cost a lot. You are limited only by your own creativity and desire to create a positive experience for yourself and your children.

When money is tight, parents often worry if they are giving their children "enough." Rest assured, in years to come children will not remember the "thing" you weren't able to buy them. Children **will** remember—and be shaped by—the amount of TIME you've spent with them.

If you'd like more information on financial assistance resources, healthy parenting or positive relationship skills, contact the Family Matters Team at ACS. We're here for you!
